PROGRAM OBJECTIVE - This program is designed to give the rural water user sufficient data about the general water quality, such that decisions may be made concerning the potability of the water and treatment techniques to improve the potability or quality, if necessary.

Cations	Anions	Other	Metals
Calcium	Carbonate	Conductivity	Copper
Magnesium	Bicarbonate	pH	Iron
Sodium	Chloride	TDS by Summation	Lead
Potassium	Fluoride	Corrosivity	Manganese
	Nitrate and Nitrite as N	Hardness	Zinc
	Sulfate	Total Alkalinity	Total Coliform
