Analytical Services sends its analytical reports to clients attached to e-mail whenever possible. The reports are attached as Adobe PDF files, which look the same as the traditional report we send via US mail. This method of reporting is used by many other laboratories and has several advantages.

1. The client receives the report two to five days sooner than by US mail.
2. The reports can be easily stored on the client's computer.
3. It reduces paper waste.

If you are interested in receiving your report via e-mail, please make sure your e-mail address is clearly printed on the sample collection form which accompanies the sample to the lab. You will need a copy of Adobe Reader to view reports.
