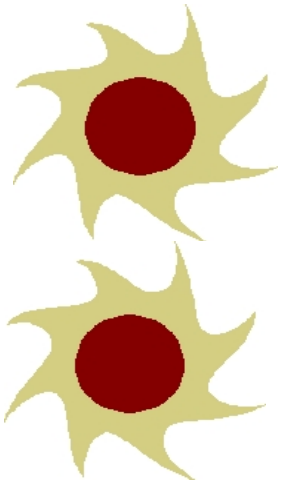
The purpose of the Climate Issues Committee is to address timely climate issues by reviewing current issues and discussing possible future climate related impacts. This committee provides an opportunity for information to be shared between various participants. Current climate-related issues are identified and reports of actions to mitigate the impacts are given. Clicking on the committee date below will provide you with information on reports given at that meeting.



Committee Meetings:

May 19, 2011

November 22, 2010

May 20, 2010

November 30, 2009
