Statement of Reasons

Upon request of the regulated seed industry, the Wyoming Crop Improvement Association; Wyoming State Seed Lab; Wyoming Department of Agriculture; and Board of Agriculture were requested to amend Chapter 51, Regulations Pertaining to Seed Law. These changes are being proposed to clarify regulations and to bring the regulations closer to conformance with current industry practices.

Below is a list of reasons for the proposed changes by section.

Proposed Changes:

- Section 2: Adoption of Federal Seed Act regulations by reference. This is not an addition of regulation, but rather an adjustment of clarity for a more logical document flow. Web address for Federal Seed Act Part 201 added.
- Section 3 – Definitions: Informational changes, used to clarify terms and make regulations more understandable and enforceable.
- Sections 4, 5 and 6: Prohibited Noxious weeds: alphabetized for easier reference, updated spelling, and Latin name changes.
- Section 7: Added Reclamation Species List notation.
- Section 8: The date of test for germination or TZ: this was inadvertently omitted in 2008 when the Wyoming Seed Law underwent changes. This information is imperative for industry practices, interstate shipment of seed, and enforcement issues for regulatory officials.
- Section 9: Tetrazolium (TZ) testing. Exceptions allowing labeling with a tetrazolium (TZ) test. This change is industry-driven to meet the needs of buyers and sellers in the reclamation industry, as seed is currently traded on a TZ basis rather than germination. This change allows people selling these species to forego the expense of a germination test that has no value other than meeting regulations. This process is currently used as an industry standard in many other states. This change would allow Wyoming growers quicker turnaround times on sample analysis, as a TZ test takes two days versus germination tests that can take up to a month depending on the species, thus allowing Wyoming growers to be more competitive in marketing for these species. Reclamation Species List added under subsection (a).
- Section 10: Minimum Germination Standards for Vegetable Seeds: State regulatory officials sample many of these products on a yearly basis and reference to Section 201.31 of the Federal Seed Act Regulations Part 201 – Germination standards for vegetable seeds in interstate commerce, allowing minimum lab standards for germination.
- Sections 11, 12 and 13: These sections deal with the written content of seed tags and labels. These are industry standards that need to be added and clarified in our state seed regulations.
- Section 14: Seed Laboratory Name Not Used in Advertising. Informational changes, protecting the Seed Lab from claims of fraud or misrepresentation.
- Sections 15 and 16: Informational changes, renumbered or dated language removed from the seed regulations, and web addresses added.
- Section 10: Removed from regulations because no longer needed.

The Wyoming Department of Agriculture is dedicated to the promotion and enhancement of Wyoming's agriculture, natural resources and quality of life.

Hi Hank,

When Denny was visiting with Gene Millstein he noticed a typo on page 51-5 of the regs. Balsamroot.....
Latin name should be Balsamorhiza spp. not pp.

Can we change this before it gets printed?

Thanks, Kim

Hi Hank,

Based upon my review of the comments received, and noting that no comments request a public hearing or provide substantive recommendations, it is my opinion that no public hearing is necessary. Please accept this email as a written determination from the Attorney General that a public hearing is not required pursuant to Step 18 of the Rules and Regulations Checklist.

The only recommendation I have is to change the "typo" in Latin spelling, if that is the case.

Thanks,
